

## MM K2R

200 ml. sprayer

### DETACHANT

K2r is extremely convenient to use. It comes in an aerosol can, is applied, and then allowed to dry for at least 20 minutes. The compound dries into a white powder. It is then brushed off, ideally using a clothes-brush. For persistent stains the procedure is repeated. The great advantage of K2r is that it leaves no ring. The K2r Stain Remover can also be used on carpets and upholstery.

The K2r Stain Remover is a Swiss product made in Australia under license by Linkarch Pty. Ltd. It is sold throughout the world and has strong consumer acceptance in Europe, The U S A, Canada, the United Kingdom, Japan and many other countries.
